

A Safety Bed Designed for Your Special Needs Loved One.

- Registered with the FDA as a Class 1 Medical Grade device.
- We are the only Safety Bed Manufactured in the US to be a certified DME company. That means we are not only FDA regulated but we have been inspected and certified by HQAA and Medicare.
- Our beds come with a 5 year warranty. With Medicaid only covering a bed every 8 years a long warranty is important.
- Twin-size Dimensions: 77 inches long x 41 inches wide x 60 inches tall, Full-size Dimensions: 77 inches long x 56 inches wide x 66 inches tall.
- Offers 360 degrees of protection from falling out of bed.
- Eliminates the 7 zones of entrapment.

The Frame

Our bed starts off with a solid Maple frame handmade in Amish country. The Amish community has been making quality furniture for generations in Ohio.

Each frame is assembled and checked for quality before being boxed.

Netting Doors and Windows

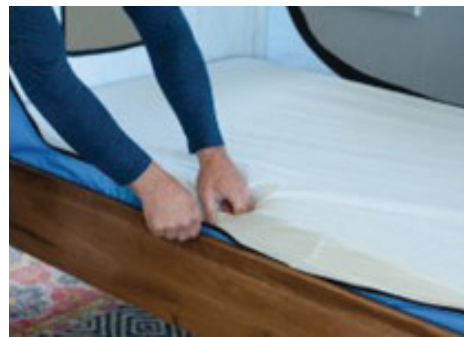

Two long netting doors on each side of the bed give users ample access to your loved one. There are also two netting windows at ends of bed and a large netting opening on top to allow air to flow freely in bed.

The Cover

Each cover is made out of 600D fabric that has undergone UL testing for safety and quality. Cover completely encloses the bed with no access to the wooden frame from inside the bed.

Our cover is also designed to be able to slightly move on top rails and corners without becoming loose on frame. This is made to help absorb the pressure if the cover is kicked, making your cover last longer.

The Mattress

Our mattresses are made to fit tightly in our frames to eliminate the risk of entrapment. Mattresses are 8 inches thick with 7 inches tightly against the frame. This helps to keep users from pulling up on the mattress.

The Zippers

Zippers are firmly held in place so you can rest easily during the night knowing your special needs loved one is exactly where they should be. There is no zipper on the inside and it is locked from the outside.
