

SwedishAmerican Pediatric Therapy Services takes a multi-disciplinary approach to therapy in order to create a collaborative environment between the family, the patient and the therapists. We work with children and their families to better understand the child's difficulties and maximize their potential through individualized program development.

We are a child-directed and family-oriented facility with a variety of therapists. Our staff includes registered and licensed occupational therapists, physical therapists, and speech language pathologists, many who hold the State of Illinois Early Intervention credential.

Coverage for Services

SwedishAmerican Pediatric Therapy Services are covered by several major insurance companies, Illinois Public Aid and the Early Intervention Program.
